LAYAN ALMOQAITEEB

UI/UX & Product Designer

Riyadh & Qassim, KSA | +966 54 195 4773 | layan.almoqaiteeb@gmail.com | linkedin.com/in/layan-almoqaiteeb | ilayan9.github.io/layan-portfolio

PROFESSIONAL SUMMARY

UI/UX and Product Designer with a Computer Science degree, designing Arabic-first enterprise SaaS for web and mobile. Works from requirements and user research through complex flows, UX audits and design systems built on Figma Variables, to developer handoff in Agile teams. Uses AI tools daily to speed up research synthesis and repetitive design work.

EXPERIENCE

World of Systems & Software — UI/UX Designer *Jan 2026 – Present*

Continuing in the same role under the Tamheer program since Aug 2026

- Designed and refined web and mobile experiences for an enterprise HR and attendance platform, from user flows to high-fidelity Arabic RTL interfaces.
- Designed an end-to-end subscriptions admin for the sales team in 2.5 weeks, mapping every request state and payment path before designing, then reviewing it with the team that uses it daily.
- Redesigned employee transfer and status-change flows after auditing the live product hands-on, exploring two directions (a guided stepper and a single page) on the unified design system.
- Conducted heuristic evaluations across company systems, writing each finding as a reproducible scenario with a severity rating and a solution-agnostic recommendation.
- Co-built a unified design system with a fellow designer: reusable components and Figma Variables for typography, spacing and color. On one redesigned screen, shared text styles rose from 2% to 99%.
- Challenged a leave-balance requirement by reviewing it against Saudi Labor Law; the evidence led the team to remove it and simplify the dialog.
- Worked in Agile sprints with Product, Business and Development teams, from requirement discussions and estimation to design reviews and developer handoff.

PROJECTS

Qatiah — Bill-Splitting Mobile App *UI/UX Design*

Masar Program by SANI, 2024

- Interviewed 10 users and analyzed 5 competing apps, then synthesized findings with affinity mapping and a persona: repayment follow-up, not bill math, was the core pain.
- Built a design system in Figma (color roles, type scale, components) and designed 12 screens around automatic reminders and visible payment progress.

WaslTech — Graduation Project *Qassim University*

Product Design & Flutter Development

- Validated the problem with research and defined the product for a digital receipt and loyalty app for Saudi retail.
- Designed the end-to-end mobile experience (receipt storage and search, returns, warranty reminders, loyalty, OCR capture) and built it in Flutter within a five-member team.

DragPath — AI Content Platform (Freelance) *UI Design*

- Designed the bilingual (Arabic/English) website UI and its design system for an AI platform that generates product images and video ads; the design is live in production.

EDUCATION

Qassim University — Qassim, Saudi Arabia *Sep 2021 – Jun 2026*

Bachelor of Science in Computer Science | GPA: 4.84/5.00, First-Class Honors

CERTIFICATIONS

- Design Systems & Tokens with AI
- UX/UI Design — Masar by SANI
- Google Data Analytics Professional Certificate — Google, Coursera (8 courses incl. capstone)
- Introduction to Artificial Intelligence — KAUST

ACHIEVEMENTS & LEADERSHIP

- 2nd Place — COP16 Hackathon | EcoTrack
- 2nd Place — Jadathon | WaslTech
- Led a 4-day, project-based UI/UX camp for 37 students

SKILLS

Design: UI/UX Design, Product Design, User Research, Interviews, Affinity Mapping, Personas, User Flows, Wireframing, Prototyping, Heuristic Evaluation, Design Systems, Arabic RTL Interfaces, Responsive Design

Tools & Methods: Figma, Figma Variables, Design Tokens, AI-assisted workflows, Agile, Sprint Planning, Developer Handoff

Technical: Flutter (Dart), HTML, CSS, JavaScript, Python, FastAPI, REST APIs, PostgreSQL

Languages: Arabic (Native), English (Professional Working Proficiency)
